

## OPSS PROV 127 Schedule of Rental Rates for Construction Equipment, including Model and Specification Reference

Comments Received			
Comment ID	Organization	Comment	Response
1	Individual	The minimum hourly rate for rear dump, tri-axle dump truck should be \$125 with no operator and \$150 with operator.	The rental rates are hourly and do not include the cost of the operator as noted in Section 127.01 Scope.
2	ORBA	Rates seem low given newly negotiated collective agreements. Requesting clarification on the Labour Adjustment Factor.	The Labour Adjustment factor is updated annually. It includes the Ontario mechanic's wage including payroll burden as part of the calculation and accounts for variation in provincial labour costs.
3	ORBA	Why is there a decrease in the rate for paver attachments (127.02.02.02)?	The paver attachment is calculated using the same methodology as all equipment in the Schedule. While most of the rates saw an increase, isolated equipment did see a decrease.
